PROFESSIONAL SUMMARY

Data Engineer focused on Azure Databricks, PySpark, Delta Lake and cloud-based data platforms. I design, build and maintain ETL/ELT pipelines, data processing workflows and reporting-ready datasets for manufacturing and business operations. My background in business analysis, L2 application support and production leadership helps me translate operational requirements into reliable, scalable data solutions. Certified in Databricks, Azure and Business Analysis.

KEY ACHIEVEMENTS

-
- Designed and implemented a Databricks-based data platform in a manufacturing environment, enabling scalable ETL processing, reporting and analytics.
 - Built CI/CD workflows with Databricks Asset Bundles, supporting version-controlled and repeatable deployments across development, test and production environments.
 - Developed automated data workflows and scheduled reporting processes, reducing manual work and improving access to production and operational data.
 - Delivered internal training on Databricks, Delta Lake and Lakehouse concepts, supporting data adoption among business users.

TECHNICAL SKILLS

Programming & Querying: Python, SQL, PySpark

Data Engineering: ETL/ELT pipelines, data processing, data validation, data modeling, data integration, batch processing

Cloud & Data Platforms: Azure Databricks, Delta Lake, Microsoft Azure, Microsoft Fabric, ADLS Gen2

Databases: MySQL, Oracle, Microsoft SQL Server

DevOps & Tools: Git, Docker, Linux, Databricks Asset Bundles, Azure Monitor

BI & Analytics: Power BI, Tableau, reporting-ready datasets, dashboard data preparation

Concepts: Lakehouse Architecture, Medallion Architecture, Data Warehousing, Data Quality, System Monitoring, Process Automation

PROFESSIONAL EXPERIENCE

Junior Business Analyst / Data Engineer

Mercedes-Benz Manufacturing Poland, Jawor

March 2024 – Present

- Design and support Databricks-based data solutions in a manufacturing environment, enabling scalable data processing, ETL pipelines and analytics.
- Build and maintain ETL/ELT pipelines using PySpark on Databricks, integrating production data from multiple manufacturing systems.
- Design Delta Lake tables and lakehouse data layers to support reliable processing, reporting and analytics.
- Develop automated reporting workflows combining data from multiple production systems and delivering scheduled outputs to business users.

- Create Databricks-based automations for SFM Digital, streamlining data workflows and reducing manual intervention.
 - Monitor pipeline performance and data quality using Databricks Lakehouse Monitoring and Azure Monitor.
 - Design and implement CI/CD workflows using Databricks Asset Bundles across development, test and production environments.
 - Collaborate with business stakeholders to translate manufacturing requirements into technical specifications and scalable data solutions.
-

Production Team Leader

Mercedes-Benz Manufacturing Poland, Jawor

September 2020 – February 2024

- Led daily production operations, coordinated team activities and supported process improvement initiatives.
 - Managed resources, monitored performance and collaborated with cross-functional teams to improve operational efficiency.
 - Built strong understanding of manufacturing processes, operational KPIs and production data needs.
-

Business Owner

EM Remonty / Furniture MORI, Świdnica

September 2017 – August 2020

- Managed business operations, customer relationships, marketing and finance.
 - Developed practical experience in business management, client communication and operational problem-solving.
-

Technical System Operator

UPM Raflatac, Nowa Wieś Wrocławska

November 2012 – August 2017

- Operated and maintained technical production systems to ensure process continuity.
- Troubleshoot technical issues and collaborated with cross-functional teams to improve system performance.

EDUCATION

Wroclaw Academy of Business in Applied Sciences

October 2023 - Present

Computer Networks and Cybersecurity

LZDZ

September 2010 - June 2012

Pharmacy Technician

CERTIFICATIONS

Databricks Certified Data Engineer Associate

Databricks

January 2026 – January 2028

Microsoft Certified: Azure Databricks Data Engineer Associate DP - 750

Microsoft

May 2026 - May 2027

Microsoft Certified: Azure Fundamentals AZ - 900

Microsoft

March 2026

Google Data Analytics Professional Certificate

Coursera

May 2025

AgileBA® Foundation

APMG International

May 2024
